INNOVATING FOR EXCELLENCE

For more than 35 years, State Seal Company has been a model of reliability and unsurpassed value. Today, as a recognized innovator in the industry, we continue to provide our customers with exceptionally high levels of service and quality.

BUILT TO LAST ATTACHING POWER!

For the better part of a century, 3M has been a model of innovation, reliability and unsurpassed value. Today, as a recognized leader in the industry, 3M continues to provide customers with exceptionally high levels of invention, service & quality. 3M prides itself on the improvements made over the years to everyday life for hundreds of millions of individuals. State Seal uses 3M™ products in a variety of applications, from materials used in bonding, to masking and fastening select environments. Each product represents more than 50 years of industry leadership in providing design and production engineers with innovative adhesive formulations.

- State Seal has it covered.

SUPERIOR ALL AROUND PERFORMANCE

- » Adhesive Transfer Tapes
- » Double Coated Tapes
- » Membrane Switch Spacers
- » Labels
- » 3M™ VHB™ Tapes
- » Pressure Sensitive Adhesives (PSA)
- » Permanent/ Repositionable Adhesives
- » Kiss cut to roll
- » Hook and Loop Fasteners
- » Electrically and Thermally Conductive Tapes and Pads
- » Structural Bonding Tapes
- » Thermo-Bond Films

OUR QUALITY PROCESS:

Our success is founded on customer satisfaction through consistent high quality.

Utilizing the latest in measuring technology, our in-process inspection ensures all parts meet specifications.

State Seal Company is registered ISO9001/AS9100 and committed to the continuous improvement of our quality system.

AS9100
Certified

TRANSFER TAPES & DOUBLE-COATED TAPES

State Seal uses a comprehensive line of 3M™ Thin Adhesive Transfer Tapes, Double Coated Tapes and Membrane Switch Spacers designed specifically to enhance the appearance and improve the overall performance of your design, helping you bring a better, more competitive product to market.

ADHESIVE TRANSFER TAPES

An unsupported adhesive film coated on a release liner coated on both side with silicone. It is extremely critical that a differential release liner (one side must be more difficult to remove the adhesive) be used for the transfer tape to unwind properly.

PROTECTIVE COATINGS & FILMS

3M Protective Coatings, Films and Tapes are used for surface protection for a multitude of applications. These products can be used on a wide variety of surfaces and help prevent everything from surface scratches, paint overspray, and reducing dirt on floors to a protective coating with non-skid, high abrasion and tear resistance.

FOIL TAPES

Resists flame, moisture, temperature extremes, UV exposure and most chemicals with a backing that withstands harsh environments. We offer metal-backed foil tapes with the conformability to wrap tightly around virtually any shape or contour.

Industrial-quality adhesive securely adheres to the surface, even in conditions with cold temperatures or high humidity. Metal backing resists failure from common sources of degradation, such as fire, water, ultraviolet rays and many chemicals.

ALUMINUM FOIL TAPES

- » *Thermally conductive for heating or cooling efficiency*
- » *Heat and light reflective*
- » *Resistant to flame, moisture, weather, UV degradation and most chemicals*

ALUMINUM FOIL REINFORCED TAPES

- » *Flexible wrap for wires and hoses*
- » *Long wearing*
- » *Tear and puncture resistant*
- » *Flame and heat resistant*

OTHER QUALITY SERVICES WE OFFER:

- » *Standard and Metric O-ring distribution*
- » *Gasket Fabrication*
- » *Custom splicing and bonding*
- » *Kit assembly*
- » *Material selection*
- » *Rapid prototyping*
- » *Custom labeling/ packaging*
- » *Inventory management programs*
- » *Slitting and laminating*
- » *Engineering support*
